Building intelligent systems. Based in San Jose and San Luis Obispo, CA.

EDUCATION

- **California Polytechnic University, San Luis Obispo** *September 2025 - Present (Expected May 2028)*
BS in Computer Science. Merit Scholar. GPA 3.965.
Coursework: Data Structures, OOP Design, Computer Organization.
Activities: Theta Tau, CodeBox, Audio Engineering Society, Indian Student Association, Hack4Impact.

PROJECTS

- **GU-Net: Diffuse Glioma Segmentation Research** *Jun 2023 - Jul 2023*
Novel neural network architecture for segmenting diffuse gliomas in medical images under data and processing constraints, achieving **71.58% accuracy**. Presented at UCSB and published in the Journal of Student Research. Developed with Pytorch & Jupyter.
- **Impasse: AI-Powered Negotiation Training Platform** *January 2026*
Engineered a full-stack AI negotiation simulator with agentic opponent, coaching, and analysis agents. Built real-time voice interaction via WebSockets with session analytics and persistent storage. Developed with FastAPI, Next.js, and various LLM and TTS services.
- **Orbis: AI Agent Observability Dashboard** *October 2025 - December 2025*
Built a full-stack platform and SDK for devs to track AI agent executions, costs, and performance. Engineered DAG visualizations, analytics and prompt versioning. Developed with React, FastAPI, & Langchain.
- **FloodSafe: Atmospheric River Prediction** *Jan 2023 - Mar 2023*
Assembled a dataset from scratch and constructed a neural network for atmospheric river prediction, achieving **over 95% accuracy**. Deployed the model to EC2 and produced a web app for real-time results. Developed with Pytorch & FastAPI.
- **ProCo: Code Contest Platform** *Sept 2022 - Jun 2025*
Contributed to and maintained a competitive programming platform for **200+ users across 4 high schools**. Engineered a remote grading server and a responsive UI. Developed with Next.js, Supabase, & Flask.

EXPERIENCE

- **President / Vice President / Head of Frontend** *Lynbrook DevX Club, May 2022 - Jun 2025*
Led development of numerous club projects and taught software engineering topics weekly to 50+ members. Expanded club to include passion project development.
- **Freelance Website Developer** *Various Organizations, Jun 2021 - Present*
Developed and delivered tailored web solutions for organizations including EuclidLearn, STEMist Education, and Care for Our Common Home, providing professional and pro bono contributions.
- **Cashier, Customer Service & Shift Leader** *Cicero's Pizza, Feb 2025 - Sept 2025*
Led shift operations at a high-volume pizzeria, coordinating team members to maintain consistent service for 500+ weekly customers. Managed inventory and resolved issues across the board.
- **Music Producer & Audio Engineer** *Freelance/Independent, Nov 2022 - Present*
Produced and released hip-hop albums across streaming platforms. Collaborated with artists, developed studio-quality music. Head of Sound for multiple theatre productions.

RELEVANT SKILLS

- **Programming** · Python, Typescript, Java, Node.js, SQL, React, Next.js, Pytorch, Git, FastAPI.
- **Technical** · Full-Stack Web Development, Object-Oriented Programming, Machine Learning, Data Structures.
- **Soft Skills** · Strong Learning Mindset, Communication, Teamwork, Time Management, Problem-Solving.
